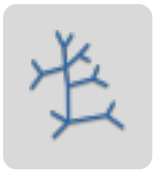
Unrooted tree style

Version 1.0.0, by Giorgio Bianchini



Description: Sets the plot actions to display the tree as an unrooted tree.

Module type: Action

Module ID: `a99eb0c6-a69d-4785-961a-a0c247e9704d`

This module is used to apply to the currently opened tree the styles necessary to draw it in a "Unrooted" ("Radial") style.

The module will enable *Radial* Coordinates module, the *Branches* module (setting it up to draw the branches in a radial style) and the *Labels* module, setting it up to show the labels in radial style. The current Coordinates module will be replaced, and all Plot actions will be removed.

Further information

Here is an example of a tree drawn with the style that results from applying this Action module:
