

Apply modules to other tree (command-line)

Version 1.0.0, by Giorgio Bianchini

Description: Applies the modules that are currently enabled to another tree.

Module type: Action

Module ID: 7476c9e4-05b1-4a92-8d36-aa878d22cceb

This module applies all the modules that are currently active to another tree file. This module can only be invoked from TreeViewerCommandLine. The new tree is opened in the current session.
