

Open file (advanced)

Version 1.0.0, by Giorgio Bianchini

Description: Opens a tree file, specifying which modules should be used for the reading and loading of the file.

Module type: MenuAction

Module ID: 98804064-922f-4395-8a96-216d4b3ff259

This module opens the "Advanced file open" dialog, which can be used to manually select which File type and Load file modules should be used to open the selected file.
