

Sort nodes

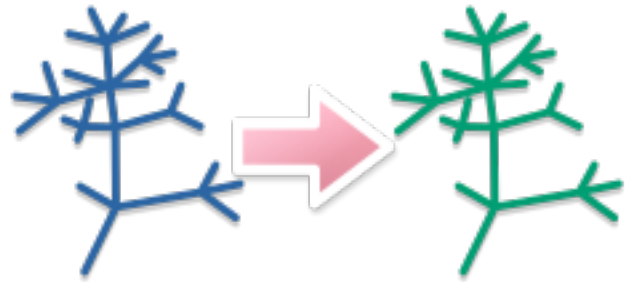

Version 1.0.0, by Giorgio Bianchini

Description: Sorts the nodes of the tree in ascending or descending order.

Module type: FurtherTransformation

Module ID:

8a3e4e83-6c4d-45a8-8737-bff99accd176

This module sort the nodes of the tree based on the number of levels of descendants. If two nodes have the same number of levels of descendants, they are sorted alphabetically based on the taxon names.

Parameters

Order

Control type: Drop-down list

Default value: Ascending

Possible values:

- Ascending
- Descending

This parameter determines the order according to which the nodes are sorted.
