Color picker

Version 1.0.1, by Giorgio Bianchini

Description: Opens a color picker window.

Module type: MenuAction

Module ID: `5c99fbfb-a6c6-4e07-915d-670b07d255c8`

This module adds a menu option to open a colour picker dialog window. If this window is opened while a text box is selected, upon clicking `OK` the contents of the text box are replaced with an hexadecimal representation of the chosen colour. The shortcut to open this window works even if a text box is focused.
