Open file (advanced)

Version 1.0.0, by Giorgio Bianchini

Description: Opens a tree file, specifying which modules should be used for the reading and loading of the file.

Module type: MenuAction

Module ID: `98804064-922f-4395-8a96-216d4b3ff259`

This module opens the "Advanced file open" dialog, which can be used to manually select which File type and Load file modules should be used to open the selected file.
